

DSAT Gas Blender Course

On the DSAT Gas Blender course you will learn how to be a qualified gas blender allowing you to provide gas mixes to appropriately qualified consumers. You will learn the physical properties of oxygen, it's associated hazards, handling requirements and what cleaning equipment is necessary and the different methods of obtaining the required nitrox or trimix blend.

The course consists of academic and practical sessions and is conducted at our dive centre in Chiswick over one day.

To enroll on the DSAT Gas Blender course you must be 18 years of age or older, be a PADI Open Water diver (or equivalent) or above and hold a nitrox certification.

The course costs £150 and includes the Gas Blender student manual, the digital DSAT Gas Mix Calculator and certification.
